

### NOTIFICATION

The following notification is being circulated in accordance with Article 10.6.

<b>1. Notifying Member:</b> <u>Brazil</u> <b>If applicable, name of local government involved (Articles 3.2 and 7.2):</b>
<b>2. Agency responsible:</b> National Telecommunications Agency - ANATEL <b>Name and address (including telephone and fax numbers, email and website addresses, if available) of agency or authority designated to handle comments regarding the notification shall be indicated if different from above:</b>  National Institute of Metrology, Quality and Technology (INMETRO) Telephone: +(55) 21 2145.3817 Email: <a href="mailto:barreirastecnicas@inmetro.gov.br">barreirastecnicas@inmetro.gov.br</a> Web-site: <a href="http://www.inmetro.gov.br/barreirastecnicas">www.inmetro.gov.br/barreirastecnicas</a>
<b>3. Notified under Article 2.9.2 [x ], 2.10.1 [ ], 5.6.2 [ X], 5.7.1 [ ], other:</b>
<b>4. Products covered (HS or CCCN where applicable, otherwise national tariff heading. ICS numbers may be provided in addition, where applicable):</b>  Frequency range from 3,300 MHz to 3,700 MHz
<b>5. Title, number of pages and language(s) of the notified document:</b> Public Consultation no. 50, 03 June 2020. <b>Language(s):</b> Portuguese. <b>Number of pages:</b> 07
<b>6. Description of content:</b> The draft act approves the technical and operational requirements of the frequency range from 3,300 MHz to 3,700 MHz for use by stations in the Personal Mobile Service, multimedia communication service, Fixed Switched Telephone Service and Private Limited Service.
<b>7. Objective and rationale, including the nature of urgent problems where applicable:</b> Quality requirements  In order to promote the analysis regarding the feasibility of the availability of additional spectrum in the 3.5 GHz band of the CD, there was a request about the possibility of providing additional spectrum of 100 MHz, in the range located between 3.6 GHz and 3.7 GHz, in the Bidding Notice now under discussion.  Thus, in order to promote a more in-depth analysis of the feasibility of providing additional spectrum in the 3.5 GHz range for mobile service systems and the possible impacts on current systems operating in the range, theoretical studies were carried out by SOR, in addition to coexistence tests, under the leadership of the Spectrum and Orbit Use Committee (CEO). Such studies were carried out in the new range of 3,300 MHz to 3,700 MHz and taking into account the satellite services assigned to frequency ranges above 3,700 MHz up to 4,200 MHz, assuming that TVRO is located above 3,800 MHz.
