

### NOTIFICATION

The following notification is being circulated in accordance with Article 10.6.

<b>1. Notifying Member:</b> <u>Brazil</u> <b>If applicable, name of local government involved (Articles 3.2 and 7.2):</b>
<b>2. Agency responsible:</b> National Telecommunications Agency - ANATEL <b>Name and address (including telephone and fax numbers, email and website addresses, if available) of agency or authority designated to handle comments regarding the notification shall be indicated if different from above:</b>  National Institute of Metrology, Quality and Technology (INMETRO) Telephone: +(55) 21 2145.3817 Email: <a href="mailto:barreirastecnicas@inmetro.gov.br">barreirastecnicas@inmetro.gov.br</a> Web-site: <a href="http://www.inmetro.gov.br/barreirastecnicas">www.inmetro.gov.br/barreirastecnicas</a>
<b>3. Notified under Article 2.9.2 [x ], 2.10.1 [ ], 5.6.2 [ X], 5.7.1 [ ], other:</b>
<b>4. Products covered (HS or CCCN where applicable, otherwise national tariff heading. ICS numbers may be provided in addition, where applicable):</b>  HS 85 ICS 33. Telecommunication equipment
<b>5. Title, number of pages and language(s) of the notified document:</b> Public Consultation 40, 9 August 2021. <b>Language(s):</b> Portuguese. <b>Number of pages:</b> 1
<b>6. Description of content:</b> Public Consultation proposal to update the technical requirements for the technical conformity assessment of Internal Signal Enhancer.  The text of Public Consultation can be downloaded only in Portuguese at:  Comments can be made at: <a href="https://sistemas.anatel.gov.br/SACP/Contribuicoes/ListaConsultasContribuicoes.asp?Tipo=1&amp;Opcao=andamento&amp;SISQSm modulo=1442">https://sistemas.anatel.gov.br/SACP/Contribuicoes/ListaConsultasContribuicoes.asp?Tipo=1&amp;Opcao=andamento&amp;SISQSm modulo=1442</a>  Selecting Public consultation No 40/2021
<b>7. Objective and rationale, including the nature of urgent problems where applicable:</b> Quality requirements.  The internal signal enhancer is an equipment used to expand the coverage area of telecommunications signals in shadow areas or areas with low signal intensity, being of great relevance to expand the coverage of mobile networks in indoor environments where the signal strength of the network is insufficient to establish voice calls or data connections with a minimum of quality.  When improperly installed and operated or when the equipment does not have characteristics aimed at preventing the occurrence of harmful interference, the signal enhancer has great interfering potential in the frequency ranges granted to personal mobile service providers (SMP and other services).  It is then understood that the certification of equipment with self-monitoring characteristics

<p>is essential to reduce the number of complaints about interfering reinforcers, besides being a first step to reduce the rejection of SMP providers regarding the use of these kind of equipment.</p>
